Student and developer focused on data structures, software architecture, and web and mobile development.

Summary

Advanced Computer Science student at Universidad Nacional del Comahue. Experience in the design and implementation of data structures, object-oriented programming, and web and mobile application development. Interested in software architecture, concurrency, and databases.

Experience and Projects

2024 — Monopay

- Mobile wallet-style application for the Monopoly game developed in React Native.
- Implementation of business logic, state management, and modular structure.
- Repository: github.com/MatiasTarta/monopay

2023 — Instruments Website

- Dynamic website developed with JavaScript, HTML, and CSS.
- Responsive design and structured code organization.
- Repository: github.com/MatiasTarta

2022–2023 — Practical Project: Data Structures

- Java implementation of graphs, AVL trees, dictionaries, and hash tables.
- Practical application of data structures in systems modeling.
- Code: github.com/MatiasTarta/Data_Structures

Education

Bachelor's Degree in Computer Science

Universidad Nacional del Comahue

2021–PRESENT

Neuquén, Argentina

- Relevant coursework: Software Architecture, Requirements Engineering, Object-Oriented Programming, Data Structures, Concurrent Programming, Database Design.

Technical Skills

- **Languages:** Java, Python, SQL, HTML, JavaScript.
- **Frameworks and Libraries:** React, Node.js, React Native.
- **Tools:** Git, Docker, Linux, VSCode, SSH.
- **Databases:** MySQL.
- **Technical Support:** PC maintenance, repair, and diagnostics.

Languages

- Spanish: Native.
- English: Advanced level.

Interests

- Advanced data structures.
- Software architecture and concurrent systems.
- Mobile and backend development.
- Technology, hardware optimization, and continuous learning in computer science.
